**Subject:** Neuhauser Landfill Site - EM Survey and AOC

Dear Mr. Dean – There have been a number of e-mails and phone calls earlier today regarding the schedule and scope of the EM survey at the Neuhauser Landfill Site, and I write this email for clarification. EPA has not been involved in overseeing the geophysical investigations in the past and will not have sufficient time to review the work plan that will be submitted for EM-61 work to be conducted this Wednesday, November 29<sup>th</sup>. In addition, the e-mails and phone calls from today indicate unclear lines of communication for the proposed work.

Therefore, EPA has determined that the EM survey work will not be included in the scope of work for the Administrative Order on Consent. Please continue to coordinate on the EM-61 work plan with CDPHE as you have in the past, with a courtesy copy to EPA.

Should more buried drums be identified during this process, they may be included in the drum removal action under the AOC. Adding any such locations will contribute to any future remedial effort at the Site.

With regard to scheduling any work that is part of the AOC, EPA must be notified in advance of any on-Site work activities.

Please do not hesitate to contact me with any questions.
